### SUITABILITY

### STANDARDS

### TECHNICAL

For optimal performance, un-sprung lever sets such as the **RT-MINI series** should be paired with full-sized locks or latches featuring **'Grip Tight Followers'**, such as those from our ZDL, VDL, and ZUK ranges.

If tubular latches are required, we recommend ordering the **'SP-RT-MINI01'** - **'Rosso Mini Spare Spindle for use with Tubular Latches'** to ensure smooth and reliable operation.

Please note that, due to the un-sprung design of the RT-MINI series, budget latches are not advised. Should tubular latches be necessary, we recommend using our **ZTLKA series**.
